Collections Manager

Transform outstanding collections from a mass of unorganized records into a highly organized report. Using a variety of filters, Easy Dental 2010 identifies which accounts to focus on first, making collections time more productive. **(Figure 1)**

Patient	Last TP	TP Total	Ins Est	Pat Est	#	Pri Rem	Sec Rem	Prv Cont

Treatment Manager

Use the new reporting and analysis tools to identify open treatment plans and turn them into revenue opportunities. **(Figure 2)**

Schedule Event

Enable staff to specify operatory schedules and eliminate creating dummy patient accounts that introduce junk data into systems and reports. **(Figure 3)**

Print Schedule View

Save time by setting up calendars for each clinician in the practice just one time and saving the preferences for future viewing and printing. This eliminates the process of selecting certain criteria each time a clinician's schedule is viewed or printed. **(Figure 4)**

Enhanced Clipboard

Reschedule, store, or switch multiple appointments at the same time with a simple click of the mouse. To use this tool, just drag appointments to the new enhanced clipboard and then drag them to their new location.

Appointment Hover Window

Easily access appointment details including patient and account information without navigating away from the Schedule module. Simply mouse over an appointment and a hover window will appear providing quicker, more efficient access to detailed patient information directly from the appointment.

Patient Privacy

Protect patient privacy by hiding or masking patient Social Security numbers throughout Easy Dental and within reports. Once set Social Security numbers will be protected both in the application and on printed reports.

Improved Help

Find answers quickly to Easy Dental questions with an updated index that contains an integrated list of content. Access any listed topic without opening separate help files for each module.
